

**Please forward this message to your Insurance IT senior staff:**

Pursuant to the [eClaimLink Technical Update 2015-02-05](#) circular that was shared with the market in February 2015, encompassing many important technical updates on the eClaims platform, please be reminded of one major update in relation to the DHPO web services:

**DHPO new web services**

It was announced that May 1<sup>st</sup>, 2015 will mark the end of the 3 month transition period from the old to the new DHPO web services. Beginning from this date, all eClaimLink integrated users were expected to be migrated and fully functioning on the new web services.

**Please be aware that the old web services are going to be deactivated on Sunday, May 17 2015 @ 11:00AM where all eClaimLink users are expected to use the new links.**

Technical details for DHPO new web services:

- Web services and web service methods on the new DHPO are identical to the previously existing web services (no changes are required on this level)

**New Web Services links:**

- Web Services Address: <https://dhpo.eclaimlink.ae/ValidateTransactions.asmx>
- Web Services WSDL: <https://dhpo.eclaimlink.ae/ValidateTransactions.asmx?wsdl>
- Please be reminded to use HTTPs requests for all the DHPO web services and eClaimLink page links, as HTTP forwarding to HTTPS will not be supported after (01/05/2015)
- An updated web service integration guide with the new links has been published on the portal Documentation can be found through the path: **eClaimLink > DHD > Documentation > Documentation: DHPO Webservice Specification 2015-02-04** ([direct link](#)) *Please log in for access.*

Please forward any questions or concerns to our support team at [support@eclaimlink.ae](mailto:support@eclaimlink.ae)

Best Regards,

**Information Desk Officer**
